

Referral for SEI Brochure - SA

Both my children and I have completed the SEI questionnaire and it has been a very illuminating process. As a parent it has provided valuable insight and guidance in both encouraging high level EQ competencies in my children and in working on developing areas that may be holding my children back. It has helped me to understand some of the tripping points we keep encountering as a family. As a business owner the results (and training) highlighted a foundational area of challenge for me which was a great aha moment. I can clearly see how developing this core competency will have a fundamental and lasting impact on both my personal and professional success and the level of motivation and happiness I will experience on the way.
